# PASCHAL MASANJA GEORGE

paschalmasanja303@gmail.com | +255764069290 | https://sanistech-portfolio-hnvi.onrender.com

## PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in software development, web technologies, databases and AI Automations. Experienced in building scalable applications using Python, JavaScript, PHP, React, Node.js, SQL, Docker, and REST APIs. Strong academic background in machine learning, distributed systems, algorithms, cloud computing, networking, and system administration, with research experience focused on AI-driven personalized meal and workout recommendations.

## EDUCATION

**THE UNIVERSITY OF DODOMA**| Dodoma, Tanzania **2022-2025**

*Bachelor Degree in Computer Science*

- Relevant Course mustering: Machine Learning, Distributed Systems, Algorithms, Cloud Computing, web development, System Administration, Networking
- Project Research: Developing Scalable Deep Learning Models for Personalized Meal and Workout Recommendations Using User Health Profiles and Lifestyle Data (advised by Dr. )
- Thesis: "**Personalized Meal and Workout Recommendation System Using AI**"

**ADVANCED LEVEL** | Old Shinyanga Secondary School, Shinyanga **2020-2022**

**ORDINARY LEVEL** | Bulyanhulu Secondary School, Shinyanga **2016-2020**

**PRIMARY EDUCATION**| Kakola A Primary, Shinyanga **2009-2015**

## INDUSTRY EXPERIENCE

**The University of Dodoma** – Industrial Training practical , Dodoma **August 2023 – October 2023**

*Software Engineer*

- Developed web-based services using **PHP, JavaScript, HTML, and CSS**, with applications containerized using **Docker** and deployed to cloud platforms.
- Designed and integrated **REST APIs** to improve communication between application components and external services.
- Optimized **SQL queries and backend services** to improve application performance and response times.
- Participated in **Agile development practices**, including sprint planning, code reviews, technical discussions, testing, and deployment.
- Worked with version control and deployment workflows to support reliable software releases.
- Applied software testing and monitoring practices to improve application reliability and maintainability.

## RESEARCH EXPERIENCE

**UNIVERSITY OF DODOMA — Computer Science Research** **June 2025 – July 2025**

*Graduate Research Assistant* ***Researcher — AI & Machine Learning***

- Researched AI-based approaches for generating personalized **meal and workout recommendations** from user profiles and lifestyle data.
- Investigated machine learning and deep learning techniques for personalized recommendation systems.

- Performed **data preprocessing, feature engineering, model training, and evaluation** using Python-based machine learning tools.
- Designed a recommendation system architecture combining user information with machine learning models to generate personalized recommendations.
- Documented research methodology, experimental results, system design, and model evaluation as part of the undergraduate thesis.

## TECHNICAL SKILLS

**Programming Languages:** Java, JavaScript, PHP, React, Next js, SQL
**Artificial Intelligence & Machine Learning:** TensorFlow, Scikit-learn, Pandas, NumPy, Machine Learning
**Web & Backend Development:** React, Node.js, PHP, HTML, CSS, REST APIs
**Databases:** PostgreSQL, SQL
**Cloud & DevOps:** Docker, AWS, Render, Git
**Computer Science:** Algorithms, Distributed Systems, Computer Networking, System Administration, Software Engineering
**Development Practices:** Agile, Test-Driven Development, Version Control, API Development, Software Testin
